**NISSAN**

You've made the choice of Nissan, congratulations. And we have a promise that we make to each and every customer:

## OUR PROMISE TO YOU

Inside or outside of our Nissan dealership, on our website and virtually browsing we have a promise to you. As an existing or new customer to our store purchasing a new or pre-owned Nissan we have a promise to you. We want you to be completely satisfied with the service you receive at every customer touch-point. You're the focus of all we do, and we're committed to providing you the highest quality service that you can find.

Your Time Matters

Professional  
Knowledge & Advice

Every Experience,  
Personalized

Consistent Focus  
on Quality

Service Writer

It's really important to me that you are comfortable here at either of our stores. I was born and raised in Cobourg so it's my hometown. I also, in February 2019 purchased Clarington Nissan and am thrilled to be a part of their growth. In fact, our tagline is: New Owner, New Management, New Attitude.

I look forward to meeting you as I travel between the two locations. As a Capricorn keep in mind that my main goal is to wear flip-flops year-round in effort to be comfortable. And, with our promise to you, you'll find comfort in letting us take care of you and your Nissan.

**Tyler Campbell**

Dealer Principal

## HERE'S WHAT GOES INTO THE COST OF SERVICING YOUR VEHICLE

Good service doesn't "just happen"! Operating a dependable service business requires organization, competent management, and a substantial capital investment. So don't judge service charges solely by the time spent repairing your vehicle. When our top-notch mechanic goes to work, many costs have been incurred just to get them ready to do the job.

### Here are some of them:

- ✓ Service Writer
- ✓ Car Jockey
- ✓ Special Tools and Testing Apparatus
- ✓ Specialized Training
- ✓ Stationary and Supplies
- ✓ Lights, Heat, Phone, Rent
- ✓ Stock of Parts
- ✓ Wage and Hour Overtime
- ✓ Building Maintenance
- ✓ Insurance, Liability, Casualty, Workmen's Compensation
- ✓ Vacation, Sick Pay, Retirement, Unemployment Compensation
- ✓ Cashiers and Clerks
- ✓ Taxes: Local, Provincial and Federal
- ✓ Add Exclusive Savings

### IMPORTANT!

Information regarding using this Service Maintenance Booklet

- Be certain that each service interval stub is dated, signed and that the odometer reading is noted.
- You may be required to verify your vehicle's maintenance history for Warranty or Service Contract coverage.
- Retain this booklet with all stubs intact as a permanent service record.

## ROUTINE CARE

### Benefits of a Maintenance Schedule

A maintenance plan allows you to plan ahead and gives you reassurance your vehicle is running optimally for the long haul.

#### Here are some benefits:

- ✓ Protects your investment & possibly allows a higher resale value
- ✓ Keeps you one step ahead of unexpected breakdowns and repairs
- ✓ Plays a crucial role in vehicle longevity
- ✓ Promotes fuel efficiency
- ✓ Optimizes safety, reliability and performance
- ✓ Ensures warranty repairs and validation
- ✓ Reduces harmful emissions and promotes a cleaner environment
- ✓ Provides a reminder of what to expect on your next visit
- ✓ Helps with your obligation to ensure the maintenance schedule is adhered to at the recommended intervals

## DELIVERY OF YOUR NEW VEHICLE

### Pre-Delivery Inspection

We take pride in providing you with your new vehicle and we'd like to make sure you are completely satisfied.

We have taken great care to prepare your new vehicle for delivery. During our pre-delivery inspection we confirm that all components of the vehicle are operating correctly, certified all fluids are filled to specification and the vehicle is detailed to perfection.

**The pre-delivery inspection was completed on:**

**Date:** \_\_\_\_\_

**Kilometres:** \_\_\_\_\_

We will complete a delivery checklist with you when you pick up your vehicle to make certain you are familiar with all of the vehicle's operations.

If you have any questions or require any additional information on any of your vehicle's operations after delivery of your vehicle please contact the sales department.

COBOURG • CLARINGTON

**NISSAN**

## YOU WILL BE GETTING A SURVEY

### Do We Have Your Email On File?

Thank you for servicing your vehicle with us. It is our goal to surpass your expectations by providing you with exceptional service experiences.

**Please take a few minutes to help us improve customer satisfaction** by completing the short customer satisfaction survey that will be emailed to you.

**Thank you for helping us serve you better.**

The screenshot shows a digital survey form titled "NISSAN SERVICE SURVEY". At the top, there is a Nissan logo and a header image of three red Nissan vehicles. The form is in English and indicates that 1 of 13 questions have been answered. The first section is "Overall Satisfaction", which asks the user to rate their satisfaction with the service experience at the Nissan Dealer. The options are "Below my expectation", "Met my expectation", and "Surpassed my expectation". The second section is "Service Initiation", which asks how convenient the appointment scheduling process was. The options are "Very convenient", "Somewhat convenient", and "Not at all convenient". The third section is "Service Advisor", which asks how the user would rate the service advisor who worked with them. The scale ranges from 1 to 10, with labels: "Did not meet my expectation" (1), "Below my expectation" (2-3), "Somewhat met my expectation" (4-5), "Met my expectation" (6-8), and "Surpassed my expectation" (9-10). The user has selected 1 for Overall Satisfaction and 10 for Service Advisor.

**NISSAN SERVICE SURVEY**

Thank you for taking a few short minutes to complete this survey!  
For every question, please select the best response based on your Service experience for your vehicle at (Nissan Dealer).  
Your opinion matters to us! Please feel free to leave detailed feedback using the "Add Comments" button.

1 of 13 answered

**Overall Satisfaction**

Overall, how would you rate your satisfaction with the service experience at (Nissan Dealer)?

☐ Below my expectation ☐ Met my expectation ☐ Surpassed my expectation

**ADD COMMENT**

**Service Initiation**

How convenient was the appointment scheduling process offered by the dealer?

☐ Very convenient ☐ Somewhat convenient ☐ Not at all convenient

**ADD COMMENT**

**Service Advisor**

How would you rate the service advisor who worked with you at (Nissan Dealer)?

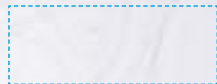

Did not meet my expectation Below my expectation Somewhat met my expectation Met my expectation Surpassed my expectation

**NISSAN**

## FOLLOW YOUR MAINTENANCE SCHEDULE

### What level of service is best for you?

Our "Recommended Maintenance" will ensure years of trouble-free motoring and the highest resale value for your Nissan.

## RECOMMENDED MAINTENANCE

### Every 8,000 kilometres or 6 months (whichever comes first)

Recommended Maintenance generally applies when you primarily operate your vehicle in temperate conditions.

## SEVERE OPERATING CONDITIONS, DO YOU QUALIFY?

Factors that affect maintenance requirements and therefore fall into severe operating conditions:

### 1 Shorter Trips

Repeated short trips of less than 8 kilometres increase your vehicle's maintenance needs.

### 2 Freezing Conditions

Canadian driving conditions are classified as 'Severe Operating Conditions' and therefore it is critical to ensure you follow the recommendations found in your owner's manual for all maintenance-related items. In cold weather, your vehicle will need maintenance more often if your average trip length is less than 16 kms.

### 3 Hot Weather

Stop-and-go traffic or long-distances at low speeds can place additional stress on a vehicle's cooling systems, requiring more frequent checks.

### 4 Salt, Dust, & Mud

Driving on salt-spread roads or in dusty, rough or muddy conditions can accelerate wear on various vehicle components.

### 5 Vehicle Loads

Towing a trailer, using a camper or car-top carrier and frequently hauling heavy loads make your vehicle work harder, so it will require attention more often.

# NISSAN

Every scheduled service visit includes a complimentary multi-point inspection. Our Nissan-trained technicians will inspect your vehicle and provide you with an easy-to-read inspection report to let you know if anything needs attention. From inspecting the thickness of your brake pads to measuring the tread depth of your tires, our Service multi-point inspections are thorough and meet our highest service quality standards.

**Our inspection shows you how your vehicle is performing, what needs attention and what can wait.**

[illegible]

**THE BEST OIL CHANGE.  
AT THE BEST PRICE - GUARANTEED.**

---

## 5 REASONS TO CHANGE YOUR OIL REGULARLY :

Reduces engine wear and corrosion

Helps cool engine components

Protects against engine wear particles and sludge

Meets or exceeds industry specifications

Promotes extended engine life

---

## THE IMPORTANCE OF A NISSAN OIL CHANGE

Keeping up with your Nissan Factory-recommended oil and filter change schedule is vital to maintaining vehicle performance. And nobody does it better than Nissan:

Nissan-Trained Technicians

Factory-recommended synthetic or conventional oil

Genuine Nissan oil filters

Complimentary multi-point inspection

---

## MAINTENANCE

### Replace Engine Oil and Filter

Modern engine oils do more than lubricate—they help remove harmful engine deposits and contaminants as you drive. The oil suspends these contaminants and carries them to the oil filter where they are trapped and held. Eventually, the oil filter becomes so saturated with these contaminants that its filtering capability is significantly reduced or made totally ineffective.

**If the oil filter is not replaced at the recommended intervals, unfiltered oil will continue to flow through the engine and cause excessive wear, which will reduce performance and ultimately shorten the life of the engine.**

---

## SYNTHETIC OIL

### Why is it important to use a synthetic oil that cleans?

A clean engine is better protected and more responsive. It's a fact of life that all engines generate contaminants. Contaminants such as soot, carbon, sulfuric and nitric acid are inevitable by-products of the combustion process; and all of them end up in your motor oil to varying degrees. So the question isn't whether you need an oil that cleans, but how well your oil cleans the dirt and deposits your engine generates.

### Why Trade Up to a Full Synthetic Oil?

Part of the job of an engine oil is to suspend the contaminants within the oil until your next oil change. It's a fairly daunting task for engine oil to suspend all the contaminants thrown at it; the truth is that full synthetic motor oils do a better job than conventional oils and synthetic blends can do.

# NISSAN

## 6 Months or 8,000 KM

(whichever comes first)

### Recommended Maintenance

- ☐ Replace engine oil and filter (Synthetic 0w20)
- ☐ 4 wheel brake inspection, pads, rotors, callipers, adjust parking brake (except 350z & 370z)
- ☐ Inspect condition of drive belts
- ☐ Inspect tire condition and measure tread depth
- ☐ Battery test and charging system
- ☐ Rotate tires, if applicable
- ☐ Road test vehicle

#### Also includes inspection of:

- Air filter
- Battery terminals
- Brake linings, drums, pads, and discs
- Clutch, CVT and automatic transmission fluid levels
- Condition of exhaust system and mountings
- Coolant fluid level and radiator hoses
- Dust covers and drive shaft boots
- Fluid levels, condition of brake lines, cables and hoses
- Horn, wipers and all exterior lights
- Lubricate locks, latches and hinges
- Power steering fluid level
- Steering components
- Suspension components
- Tire pressure
- Top up windshield washer fluid

Upon inspection of your vehicle and based on your individual driving habits additional services may be required.

### Brake Fluid Exchange/ Replacement Service

Brake fluid is extremely hygroscopic (attracts moisture) which results in contamination and fluid breakdown. This shortens the life of expensive master cylinders, pneumatic parts, brake lines and fittings. For ultimate protection, all the old fluid must be removed and replenished.

#### Process

- Remove contaminated fluid from the entire hydraulic system
- Replace the old fluid with Ultra-Dry high-temp formula DOT 4 Brake Fluid, which is proven to prevent corrosion
- Brake system inspected for leaks, master cylinder corrosion, worn pneumatic parts, harmful varnish buildup, broken or rusted bleeder valves, worn rotors and drums and air in the brake lines

#### Results

- Safer brake operation
- Longer component life
- Protects against rust and corrosion

Brake fluid before and  
after service

## **DON'T FORGET!**

Gift certificates make a great gift for any time of year. Available in any denomination.

## WHAT'S STOPPING YOU?

### The Importance of Nissan Brake Service

We will provide a complete inspection of your brake hardware, hydraulics, friction material and emergency brake (brake pads, caliper sliders, shoes, rotors, or drums, brake lines and fluid). We will provide you with a report on what can wait or what may need attention right now.

With brake service you can extend the life of your brakes and improve performance. Brake pads and caliper sliders can become stuck over time due to moisture, dirt, road salt and freezing weather. Proper cleaning of these components will typically help extend brake life.

**For optimal service, brakes should be serviced by Nissan trained technicians every 24,000 service intervals.**

## HOW TO TELL IF YOUR BRAKES NEED SERVICE

Your brake warning light is on

You hear squealing or grinding when you apply the brakes

Your vehicle pulls to one side or another when braking

It takes a longer time to stop than normal

Your brake pedal or steering wheel pulsates when you hit the brakes

COBOURG • CLARINGTON

## MAINTENANCE

### In-cabin Microfilter Change

#### Cleaning the air you breathe

Did you know that most Nissan vehicles are equipped with an in-cabin microfilter that filters out dust, pollen, sand, bacteria, cigarette smoke and other minute airborne particles? A dirty in-cabin microfilter may restrict air-flow volume and cause a drop in the overall performance of your heating and cooling system. Genuine Nissan in-cabin microfilters are designed to perform better. Replace your in-cabin microfilter and keep the air inside your vehicle healthy and fresh.

## GENUINE NISSAN BRAKING POWER

You can't overstate the importance of your braking system. That's why it's vital that your brakes be serviced regularly by our Nissan-certified technicians using Nissan Genuine Parts. Should you need replacement parts, your Nissan dealer has the right pads, rotors and more for your particular model - on the shelf and ready to go.

## HOW TO TELL IF YOUR BRAKES NEED SERVICE

Your brake warning light is on

You hear squealing or grinding when you apply the brakes

Your vehicle pulls to one side or another when braking

It takes a longer time to stop than normal

Your brake pedal or steering wheel pulsates when you hit the brakes

COBOURG • CLARINGTON

# NISSAN

## 36 Months or 48,000 KM

(whichever comes first)

### Recommended Maintenance

- ☐ Replace engine oil and filter (Synthetic 0w20)
- ☐ 4 wheel brake inspection pads, rotors, callipers, adjust parking brake (except 350z & 370z)
- ☐ 4 wheel brake service to improve brake performance and extend brake pad life (includes calliper and brake pad lubrication, remove brake pads, rust and corrosion)
- ☐ Inspect condition of drive belts
- ☐ Inspect tire condition and measure tread depth
- ☐ Rotate tires, if applicable
- ☐ Road test vehicle

#### Also includes inspection of:

- Air filter
- Battery terminals
- Brake linings, drums, pads, and discs
- Clutch, CVT and automatic transmission fluid levels
- Condition of exhaust system and mountings
- Coolant fluid level and radiator hoses
- Dust covers and drive shaft boots
- Fluid levels, condition of brake lines, cables and hoses
- Horn, wipers and all exterior lights
- Lubricate locks, latches and hinges
- Power steering fluid level
- Steering components
- Suspension components
- Tire pressure
- Top up windshield washer fluid

Upon inspection of your vehicle and based on your individual driving habits additional services may be required.

# 10% OFF

## Wheel Alignment

Hitting potholes, rubbing curbs and bumping concrete parking stops knock things in your steering and suspension around and, eventually, things are not straight anymore. Keeping your wheels aligned will prevent tire wear, increase fuel mileage by reducing road friction, and improve the vehicle's handling.

Even without abuse, front wheel alignment will change under normal, everyday driving conditions. The change may be so gradual that it is not noticed at first. A wheel alignment is highly recommended during seasonal tire changes at least once a year by most tire manufacturers.

## **BRONZE Detail Package**

*Includes:*

- Hand wash
- Cleaning of wheel wells
- Door jambs
- Dressing of tires and cleaning of rims
- Interior vacuum of seats, carpets and mats
- All interior and exterior windows cleaned

## **SILVER Detail Package**

*Includes:*

*Bronze package PLUS:*

- Shampooing of all mats, which helps eliminate dirt, stains and odours
- Complete interior clean:
  - Dashboard
  - Vents
  - Consoles
  - Cupholders
  - Doors
  - Sidewalls

## **GOLD Detail Package**

*Includes:*

*Silver package PLUS:*

- Spot cleaning of the headliner
- Cleaning of carpets and seats
- Pre-wax cleaner which helps replenish dull finishes caused by oxidation, and a wax application for a durable finish

## **PLATINUM Detail Package**

*Includes:*

*Gold package PLUS:*

- Shampooing of all upholstery and fabric to help remove all dirt, stains and odour-causing bacteria
- High-speed buff and polish
- Complete engine compartment detailing

## VEHICLE DETAILING IS AVAILABLE FOR ALL MAKES AND MODELS.

## MAINTENANCE

### Driveline and 4/4 Fluid Replacement

The differential is the melon shaped part that sits between the wheels. It is the last stop along the drivetrain before torque is transferred to the wheels. The differential allows the wheels to rotate at different speeds for effective 4 wheel and or all wheel driving. It transfers torque to the wheels, causing them to spin, which in turn moves the car.

The purpose of the differential fluid is to cool and lubricate your differential. Without the oil your differential would overheat due to the metal-to-metal contact and burn itself out. Because the differential is at the rear and under the car, it doesn't get serviced on regular basis. But if lubrication in the differential fails, you won't be getting very far for very long.

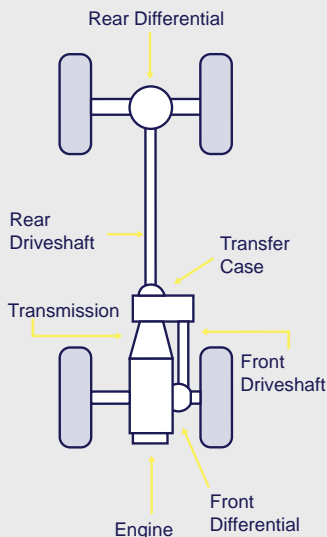

All drive-line fluids serve the same basic purpose: they help protect the gears from corrosion, heat and most other damaging elements.

The transfer case is a gearbox found only in four-wheel drive and some all-wheel drive vehicles that sends drive power from the engine to the front axles. Lubricating fluid inside the transfer case draws heat away from the gears, helping to preserve the life and performance. This fluid should be changed upon recommendation or more often if off-roading/towing/hauling etc.

Rear Differential is a messy job meant for a Nissan technician. For timing of changing the fluid: if you are towing or hauling or your vehicle experiences temperature fluctuations - this fluid requires inspection of quality and should be changed based on recommendation.

**Once the fluid is drained and completely replaced, you are good to go. This service should be completed every 50,000 kms.**

## MAINTENANCE

### Brake Fluid Service

Brake fluid is extremely hygroscopic (attracts moisture) which results in contamination and fluid breakdown. This shortens the life of expensive master cylinders, pneumatic parts, brake lines and fittings. For ultimate protection, all the old fluid must be removed and replenished.

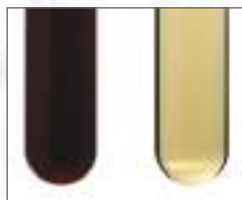

#### Process

- Remove contaminated fluid from the entire hydraulic system
- Replace the old fluid with Ultra-Dry high-temp formula DOT 4 Brake Fluid, which is proven to prevent corrosion
- Brake system inspected for leaks, master cylinder corrosion, worn pneumatic parts, harmful varnish buildup, broken or rusted bleeder valves, worn rotors and drums and air in the brake lines

#### Results

- Safer brake operation
- Longer component life
- Protects against rust and corrosion

## HOW DO I KNOW WHEN TO REPLACE MY TIRES?

**The type of vehicle, specific tire and driving style determine the life of a tire.**

Many are rated to last 30,000 to 70,000 kilometres, but an aggressive or sport style tire can wear out in as little as 15,000 kilometres.

Customers may deviate from OEM specification in the interest of better looks or performance, which can cause need for more frequent replacement of tires.

**Your service advisor will check your tires at every service visit, and let you know if anything needs to be addressed.**

## MAINTENANCE

### Replace Engine Oil and Filter

Modern engine oils do more than lubricate—they help remove harmful engine deposits and contaminants as you drive. The oil suspends these contaminants and carries them to the oil filter where they are trapped and held. Eventually, the oil filter becomes so saturated with these contaminants that its filtering capability is significantly reduced or made totally ineffective.

**If the oil filter is not replaced at the recommended intervals, unfiltered oil will continue to flow through the engine and cause excessive wear, which will reduce performance and ultimately shorten the life of the engine.**

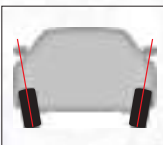

### Rotate and Balance Tires

Regular tire rotation prolongs tire life. Tires are inspected for wear, improper alignment, inflation pressure, and steering/suspension concerns. Tire balance should be checked every year, or when a vibration is noticed in the steering.

## WHAT IS THE NISSAN CANADA FINANCE LOYALTY PROGRAM?

The simple answer? Our way of saying "thank you" for being a loyal customer!

Our primary goal at Nissan Canada Finance is to offer our valued customers a hassle-free, quick and smooth transition into their next new Nissan vehicle. We want to help you and your family members make every journey a memorable one and as a loyal customer, we can deliver more! If you are leasing or financing your Nissan vehicle with Nissan Canada Inc., or if you currently own a Nissan vehicle 2010 model year or newer, you are eligible to take advantage of the Nissan Canada Finance Loyalty Program.

Designed with your needs in mind the Nissan Canada Finance Loyalty Program offers you the flexibility to adapt it to your particular situation. You decide how the Nissan Canada Finance Loyalty Program makes the most sense for you in your transition to your next Nissan vehicle.

**Ask about the loyalty program today.**

**\$500.00 - \$1000.00**

## MAINTENANCE

### Drive Belts

Drive belts, once called fan belts or alternator belts, play a vital role in the operation of the engine. While the engine is running, power is transmitted through one or more drive belts to a number of vital external engine components. Among the systems that depend on drive belts for power are the alternator, which supplies the entire vehicle with its electrical requirements, and the power steering pump, which provides power assist to the steering system.

Should a drive belt fail, these systems will cease to function and the steering will immediately become stiff. A warning light on the instrument panel immediately alerts the driver about the failure and the vehicle can still be safely driven for a short period of time. It is recommended that you contact our service department immediately to arrange for the installation of a Genuine Nissan Drive Belt.

## MAINTENANCE

### Engine Coolant Flush and Fill

Antifreeze serves two important functions: protecting the cooling system at temperature extremes and inhibiting rust and corrosion in the system. Many antifreezes also have additives that help lubricate the water pump and thermostat, so coolant has multiple advantages over just plain water.

Rust and sediment can accumulate in the cooling system. Flushing the radiator helps keep the cooling system clean and working smoothly.

#### Process:

There are four steps to restore and replenish the complete cooling system:

- ✓ Power-clean the entire cooling system, including radiator, engine passages and cooler lines
- ✓ Remove rust, scale, sludge and all used coolant
- ✓ Install new premium coolant and special corrosion inhibitors to condition and provide ongoing protection
- ✓ Check cooling system for leaks and proper fluid level

#### Results:

- ✓ Cooler running engine
- ✓ Clears cooling passages within the engine resulting in long life
- ✓ Longer life for water pump, radiator and hoses

## MAINTENANCE

### In-cabin Microfilter Change

#### Cleaning the air you breathe

Did you know that most Nissan vehicles are equipped with an in-cabin microfilter that filters out dust, pollen, sand, bacteria, cigarette smoke and other minute airborne particles? A dirty in-cabin microfilter may restrict air-flow volume and cause a drop in the overall performance of your heating and cooling system. Genuine Nissan in-cabin microfilters are designed to perform better. Replace your in-cabin microfilter and keep the air inside your vehicle healthy and fresh.

### Brake Fluid Service

- ☐ 4 wheel brake inspection, pads, rotors, callipers, adjust parking brake
- ☐ Inspect condition of drive belts
- ☐ Inspect tire condition and measure tread depth
- ☐ Battery test and charging system
- ☐ Rotate tires, if applicable
- ☐ Road test vehicle

#### Also includes inspection of:

- Air filter
- Battery terminals
- Brake linings, drums, pads, discs
- Clutch, CVT and automatic transmission fluid levels
- Condition of exhaust system and mountings
- Coolant fluid level and radiator hoses
- Dust covers and drive shaft boots
- Fluid levels, condition of brake lines, cables and hoses
- Horn, wipers and all exterior lights
- Lubricate locks, latches and hinges
- Power steering fluid level
- Steering components
- Suspension components
- Tire pressure
- Top up windshield washer fluid

## MAINTENANCE

### Wheel Alignment (Coupon on page 26)

Hitting potholes, rubbing curbs and bumping concrete parking stops knock things in your steering and suspension around and, eventually, things are not straight anymore. Keeping your wheels aligned will prevent tire wear, increase fuel mileage by reducing road friction, and improve the vehicle's handling.

Even without abuse, front wheel alignment will change under normal, everyday driving conditions. The change may be so gradual that it is not noticed at first. A wheel alignment is highly recommended during seasonal tire changes at least once a year by most tire manufacturers.

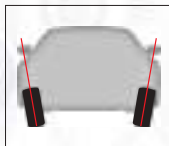

### Rotate and Balance Tires

Regular tire rotation prolongs tire life. Tires are inspected for wear, improper alignment, inflation pressure, and steering/suspension concerns. Tire balance should be checked every year, or when a vibration is noticed in the steering.

## VALUE ADVANTAGE™ BRAKE PADS & ROTORS

---

### GENUINE NISSAN BRAKING POWER

You can't overstate the importance of your braking system. That's why it's vital that your brakes be serviced regularly by our Nissan-certified technicians using Nissan Genuine Parts. Should you need replacement parts, your Nissan dealer has the right pads, rotors and more for your particular model – on the shelf and ready to go.

---

### HOW TO TELL IF YOUR BRAKES NEED SERVICE

Your brake warning  
light is on

You hear squealing or  
grinding when you apply  
the brakes

Your vehicle pulls  
to one side or another  
when braking

It takes a longer time  
to stop than normal

Your brake pedal or  
steering wheel pulsates  
when you hit the brakes

**TIRE  
ADVANTAGE**

**24-MONTH  
ROAD HAZARD  
COVERAGE**

## THE WORST SCENARIOS CALL FOR THE BEST COVERAGE.

Eligible tires purchased at your Nissan retailer location include 24-month road hazard coverage:

- 100% coverage the first year
- 50% coverage the second year
- Flat tire repair coverage up to \$40 per occurrence.

See your service advisor for complete details. Eligible tires are Nissan original equipment (OEM), original equipment alternative (OEA), winter (WIN), tire and wheel packages (PKG), and winter tire and wheel packages (WPK). Nexen tires do not come with road hazard coverage.

Coverage eligibility is determined by date or until 3/32" or less of tread remains, whichever occurs first.

## YOUR NISSAN TIRE ADVANTAGE.

## GREAT SELECTION. BEST PRICE GUARANTEED.

We carry the tire brands recommended to meet the high-quality standards of your Nissan and provide you with superb performance, comfort, efficiency and handling -- all at a great value. Plus, you can rely on our expert technicians to provide the expert and reliable mounting, balancing and rotation services your Nissan requires.

## IT'S YOUR RIGHT.

As stated in the Ontario Auto Insurance Consumer's Bill of Rights, Section 13: **It is your right to choose your repair facility.**

Drive or have your vehicle towed to the experts at **Fix Auto** to restore your vehicle to its original factory standards.

No charge collision towing\*

No charge towing is valid on all Insurance Collision claims completed at our collision facility.

\*Within a 200KM radius

**Take photos of everything that might assist in reporting the collision.**

## WHAT TO DO IN THE EVENT OF A COLLISION

- 1 Ensure safety of all occupants. Call 911 if anyone is injured.
- 2 Move vehicles to a safe location (if driveable).
- 3 **Do not sign anything for anyone other than the police!**
- 4 At the scene, fill out the collision data form provided on the following pages. Both your insurance company and the police or the collision reporting centre will require this information to process any claims.
- 5 Remember to use your **no charge tow card** if your vehicle is not driveable.

In Ontario, all accidents exceeding \$2,000 in combined damage to vehicles must be reported to the police or a collision reporting centre within 24 hours.

**If necessary, contact the police.**
